## Bill for a World Legislative Act

## STRATEGIC PLAN OF THE PROVISIONAL WORLD PARLIAMENT

Summary: Strategic Plan Provisional World Parliament

Date and place:

World Legislative Law #

Short title: Activation of the World Boundaries and Elections Administration

### The Provisional World Parliament:

### Considering:

The need to have a strategic vision,

Approves the **TWO TRACK STRATEGY** for the establishment of democratic world federal government:

We have defined a strategy for the ratification of the Earth Constitution consisting of two paths, which is correct. However, neither of the two paths manages to gain sufficient traction, so we need a **DRIVING FORCE**, as the starter motor.

This is the **World Campaign for Democracy**, which seeks to create an inclusive International Coalition of organizations and personalities to unify efforts towards federated democratic world governability.

From it has emerged the important **Commission for Legislative Review**, open to all nations, organizations and qualified people who wish to participate, to undertake an organized and systematic study of the Earth Constitution with the aim of updating it and making it as strong and universal as possible.

All this for Holding the **16th Session of the Provisional World Parliament** from December 7 to 10 of this year 2025, with a view to a future **World Constituent Assembly**.

Under this driving force, we take on two strategic paths for the ratification of the Earth Constitution.

Finally, we are activating ECI/WCPA to its full potential to ensure the success of this strategy and, once the 16th PWP session is held, we will pass the baton to the PWP,

leaving WCPA inactive and only ECI for fundraising, while a way is found to do it through the PWP.
