WLA 86

WORLD LEGISLATIVE ACT ON CIVIL ASSET FORFEITURE[1] RELATED TO ILLEGAL ACTIVITIES IN WEAPONS OF MASS DESTRUCTION, INCLUDING NUCLEAR WEAPONS IN FAVOR OF THE CAUSE TO HUMAN COMMUNITY[2]

Please Note: The Commission for Legislative Review has approved WLA 86 on the condition that this act be turned over to a committee within the Permanent Secretariat of the PWP to integrate this Act with this Act Legislative World number 13 as well as several other WLAs pertaining to nuclear weapons that have already been passed by the PWP. The result needs to be a comprehensive world law regarding all aspects of nuclear weapons, abolition, decommission of and removal of these from the world, as well as appropriate penalties pertaining to violation of any and all provisions if this comprehensive act. This comprehensive act is to be submitted at the 17th Session if the Provisional World Parliament which may soon begin meeting with frequency and regularity through the establishment of the PWP Permanent Secretariat.

The Human beings of all world's towns proclaim the following world legislative act on civil asset forfeiture related to illicit activities in Weapons of mass destruction including nuclear weapons in favor of the Human Community, in order that it realizes the fundamental right of Survival of each human being, human grouping and humanity as a species, pre-existing right to any formation of the States be National or Federal State of the Earth.

Preamble / Preface

[1] Civil Asset Forefeiture is the permanent loss of property for failure to comply with the law. In my country is named "Extinción de Dominio".

[2] By David Quispe.

- Considering that human dignity is the essential value of the universal human community and sustenance of every exercise of legitimate power, which is at your service; besides the Treaty on the Non-Proliferation of nuclear weapons and the International Atomic Energy Agency (IAEA) as well as Advisory Opinion A/ 51/ 218 of the International Court of Justice on legality of the threat or use of nuclear weapons; which led to the first, thirteenth World Legislative Acts of the World Parliament in addition to creating the World Disarmament Agency has declared the prohibition of weapons of mass destruction including nuclear weapons, conceiving the actions of investment in, designing, investigating, testing, producing, manufacturing, transporting, deploying, installing, maintaining, storing, selling, buying or detonating any nuclear or other weapons of mass destruction according to the list contained in Appendix A of the mentioned Act as crimes against humanity, insofar that as a threat or danger it affects in itself human dignity and potentially attacks not only the survival of a human being, but of entire populations and even of the human species.

- Affirming that before the sovereignty of the State over a pre-existing territory there is a fundamental right to survive, as an individual, as a group and as a human species whose recognition is an essential premise for all human coexistence, the same as being objectively threatened with the presence of weapons of mass destruction determines that the actions of investment in, designing, investigating, testing, producing, manufacturing, transporting, deploying, installing, maintaining, storing, selling, buying or detonating any nuclear weapon or other weapons of mass destruction anywhere in the planet constitutes a crime against humanity and therefore illegal activity, even if the corresponding National or Federal State, democratic or not, or a conventional norm between States declares it a lawful act.

- Affirming the presence of enormous interests around illicit activities related to weapons of mass destruction and recognizing that up to now state standards at the level of contemporary Nation States and international conventions for the limitation of nuclear weapons, including the first World Legislative Act of Prohibition of Weapons

of Mass Destruction and Nuclear Weapons of the World Parliament[3] have been insufficient for the purpose of eradicating, diminishing or attacking the manufacture, maintenance or preservation of weapons of mass destruction including nuclear weapons; fundamentally due to its limited punitive nature, non-reception of the States, lack of knowledge of the norm by the technocracy and because it does not economically attack the power of the organizations that sustain the illicit activity against humanity.

- Recognizing the effectiveness of the civil asset forfeiture figure as a global disempowerment tool for any international criminal organization, particularly that dedicated to drug trafficking, which is why, with greater reason, it can and should be used to attack the economic power of any organization private, para-state or State that performs some of the illegal activities against humanity already described in World Legislative Law # 1 that prohibits Weapons of mass destruction including nuclear weapons and creates the global department for disarmament; and that potentially affects or endangers the most basic human right that is the survival of the human species.

- Convinced that the conscience of every human being and not violence, is what determines the central content and destiny of any legal norm, which is why the state norm that manifestly attacks fundamental substantive rights of basic recognition as human beings to the point of mean the risk of the survival of the human species, loses its nature of a valid legal norm before the Universal Human Community (expression that includes the integrity of human beings present and all future generations), which although it does not have the coercive force present, by gravitating in the consciousness of humanity, sooner or later, its enforceability will prevail in the mode of responsibility for acts already performed contrary to human consciousness.

- Aware that the use of nuclear weapons in the world has meant until now the extermination of hundreds of thousands of human beings and today; in the

[3] Included thirteenth and nineteenth World Legislative Acts of WPCA.

circumstance that there is an increasingly interdependent global human life community that faces the problem of the manufacture and use of weapons of mass destruction including nuclear weapons[4] that in addition to having the potential for extermination of the entire human species[5]; its only presence in at present, it determines a growing situation of risk to human survival, becoming in itself a weapon of threat or pressure, which prevents or cancels the development of authentic dialogue that allows mutual understanding in the resolution of international disputes and the projection and assumption of effective measures that seriously confront the great problems of humanity.

- We proclaim this World Legislative Act On Civil Asset Forfeiture related to illicit activities in weapons of mass destruction including nuclear weapons in favor of the cause to Human Community, and we call to adopt it, as a common purpose for all human beings, peoples, scientists, technicians, members of the army, authorities, defenders of the people, prosecutors, judges of all nations of the world, know it, disseminate it, recognize the truth and validity of its provisions and apply this Universal Law ensuring through decisions, measures and mechanisms that Universal recognition and application are within reach, among all peoples and the States of the World.

5 According to Stockholm International Peace Research Institute (SIPRI) al 2020 there are 13,865 nuclear weapons in the world https://www.sipri.org/media/press-release/2020/nuclear-weapon-modernization-continues-outlook-arms-control-bleak-new-sipri-yearbook-out-now; and they are enough to end the human species (See Hans Blix "Is the world on the road to peace or war?"SIPRI Annual Lecture N° 1 (2018: p.5) SIPRI when sais: "The stocks of nuclear weapons still suffice to end human civilization in a quick suicide, while we have added the risk of a slow suicide through global warming."

manufacture, transport, deploy, install, maintain, store, sell, buy or detonate any nuclear or other weapons of mass destruction according to the list contained in Appendix A of World Legislative Act No. 1 are goods or real estate of ownership of the Universal Human Community.

Article 2.- Current Effectiveness of Civil Asset Forfeiture on weapons of mass destruction including nuclear weapons to favor of cause to the human community

It corresponds in full right since the validity of this law its application force by or for the scientist, technocrat, official, military, including other collaborating persons such as driver, cleaning server, etc. As well as any legal person, parastatal and public legal entities, and in general any state of the planet, for the following:

A. Any of the authorities of any of the respective States that are directly or indirectly affected by the extinction of ownership, or on the contrary invoking affectation to the Universal Human Community may administratively, at the investigative stage of the Public Prosecution or judicially initiate the process of extinction of ownership or their respective preparatory activities on goods related to illegal activities in Weapons of mass destruction including nuclear weapons in favor of the Human Community in accordance with the rules that govern their country in relation to the act on civil asset forfeiture in general and if this is not foreseen in its system according to the rules of the model law on the act on civil asset forfeiture and the general principles of the process that are judicially appropriate considering the autonomy of said process.

B. Any scientist, technocrat, official, military, including other collaborating persons such as driver, security guards, cleaning staff, etc, of the illicit activities related to weapons of mass destruction including nuclear weapons regulated in this universal law can and should, despite what is established or ordered by their administrative or labor superiors of their respective country, refuse to continue collaborating in the development of Illicit activity The contravention of this provision will have the full effect of the extinction of entitled to any monetary and / or remuneration for

any concept received, accrued or accrued in consideration for participating or collaborating in the illegal activity, the ownership of which corresponds to the Universal Human Community.

C. The foregoing assumption will not be applicable to the actor or collaborator of the illegal activity that presents its effective declaration before the competent authority that knows the investigative stage of the process or in its absence before the World Disarmament Agency, whose veracity must be corroborated by other means evidence.

Article 3.- Process to Act On Civil Asset Forfeiture of weapons of mass destruction including nuclear weapons in favor of the human community

If the legislative act on civil asset forfeiture described in article 2 were not initiated at any time, it may be initiated by the instances designated by the WCPA in accordance with the World Constitution and its respective laws. The act on civil asset forfeiture is imprescriptible.

Article 4.- Ownership of the Universal Human Community

The ownership of the Universal Community is exercised by its representative bodies designated by the World Parliament and its main purpose is World Peace and the fight against extreme poverty.

Article 5.- On the increasing monitorization of the Human Community in relation to illicit activities related to Weapons of mass destruction including nuclear weapons

While the representative bodies of the Universal Human Community are not sufficient, any human being who conscientiously exercises public power is a competent member of the body whose ownership belongs to the Universal Human Community.

Subproposals to operationalize this proposal II in an effective way:

Collegium of World Human Beings to Justice

Invitation to membership ***by David Quispe***

The presence of global problems that endanger the survival of the human species is undoubtedly the most important event at this time of medium and long term that, although it reminds us of the great family that inhabits this planet, it also announces that tragically there are two common risks amalgamated of a character growing: that of massive destruction by nuclear weapons and that of ecological catastrophe, a circumstance that challenges the establishment of free and conscious collective actions of a global nature, capable of guiding human action in defense of the survival of our species.

The awareness of this situation comes to us after the permanence and decline of a modern promise of unlimited progress about technology and science, with the only limit of the economic rules and the substantive laws coming from the Nation States and Federals of the planet. As a result of the Covid 19 pandemic, we are witnesses to the disenchantment of this promise that, given the limits of reality defined by the instinct for self-preservation and expressed lately in the global experience of confinement and social distancing, reminds us that we are living with more than 15,000 nuclear weapons with the ability to disappear not only the cities but rather the entire planet, living parallel in rampant material progress extended to the middle classes of the privileged countries. It is time to wake up from the consumption dreams to process the bitter experience of the absence of preventive measures against the origin of the pandemic announced by the scientific community at least five years before its devastating onset, generating from the conscious citizen initiative, faced with the inaction of the institution, the just global measures that stop and overcome the imminent nuclear or ecological catastrophe also announced by the scientific community since 1947.

There is no way to realize our personal, family, and work dreams without first ensuring the survival of our species. Therefore, without sacrificing our personal goals, we must recognize our ideological, moral, national, cultural, ethnic, and religious diversity; respecting and ultimately accepting the diversity of regulations of the respective Nation States of each territorial space of the planet. Thus, it is up to us as beings committed to respecting and appreciating our ancestors and loving our children, grandchildren, great-grandchildren, and other linear or collateral descendants, to do everything in our power to ensure the continuity of the survival of our species.

Membership of the World College of Human Beings to Justice is open to all citizens of the planet regardless of their social, professional role, gender,

ideological, religious, political, nationality, etc. either a member of the World Constitution Parliament Association or not; that, in the absence in the world of a capable parastatal, state or conventional institutional system, has the purpose of carrying out non-violent peaceful collective actions aimed at stopping the behaviors of design, research, testing, production, manufacturing, transportation, deployment, installation, maintenance, storage, sale, purchase, investment or detonation of any nuclear weapon or other weapons of mass destruction as well as effective actions that stop the incessant increase in ecological risk affecting the right to survival of humanity.

Aware that when the threat or flagrant attack on fundamental rights occurs, without the presence of a state authority authorized to apply the law, the use of proportional physical force is universally recognized to defend in the exercise of the right in self-regulation. Self-regulation is defined as the right of the citizen or human being to defend himself naturally without requiring the intervention of any public authority. Consequently, in the current circumstance, when the danger is not the affectation of the fundamental right of an individual but the affectation of the collective fundamental right of the entire human species proper to the announced imminent catastrophe, self-regulation in the absence of institutional action, takes particular characteristics as an articulation of natural law actions.

Thus, beyond what is bureaucratically declared by the institutions to which individuals belong as members, every woman or man recognizes, announces and undertakes in self-regulation of the aforementioned right, to the following actions: i) The immediate application of the articles of the World Constitution of the World Constitution Parliament Association, as well as the legislation given in relation to it whose objective is to make effective the self-regulation of the species, particularly the universal law of extinction of ownership of property related to illegal activities in weapons of mass destruction including those nuclear weapons a favor of the Human Community "; ii) Developing and creatively strengthening activities aimed at fulfilling our personal activities of our individual project while promoting the achievement of collective activity in defense of the survival of the species, such as the constitution of Professional or Occupational Associations for the defense of the human species, favoring activities such as conducting forums, watssaps, facebooks, networks, diplomas, postgraduate studies, research in indexed journals, creation and use of trademarks or trade names of useful media that promote the implementation of effective measures for the application of the universal law of extinction of dominion and other measures oriented to an effective paralysis of such activities and the establishment of a world order effectively oriented towards the continuity of human life on the planet.
